MASTER

ARCHITECTURAL PAINTING SPECIFICATION

(Parallel Version KM-DE)

The information contained in this Behr Parallel Specification is primarily intended for use in reviewing commercial painting specification submittals. Because coating manufactures may change product formulations, users of this comparative data assume all responsibilities for acceptability of references such as resin types, composition, or gloss levels contained herein. Due to the many variables of Architects' project painting specifications, it is recommended that the paint manufacturer(s) be contacted for their product's intended use, technical data, SDS and VOC content compliance with authorities having jurisdiction.

These BEHR PAINTS are in conformance with LEED v4 BUILDING DESIGN AND CONSTRUCTION for LEED v4 BD+C New Construction, Core and Shell, Schools, Retail, Hospitality and Healthcare. All Behr Paints comply with South Coast AQMD Rule 1113. Interior and other Behr Paints are GREENGUARD® Gold Certified.

1801 E. St. Andrew Place | Santa Ana, California 92705 (714) 545-7101 | Fax (714) 241-1002

SECTION 09 90 00 PAINTS AND COATINGS

PART 1 - GENERAL

1.01 SUMMARY

Work includes furnishing of materials and equipment, preparation of surfaces and completion of painting and finishing of surfaces as required by Drawings and specified herein.

1.02 RELATED WORK

- A. Factory, pre-finished items as specified in various sections.
- B. Shop painting specified in respective sections.
- C. Architectural woodworking.
- D. Surfaces not to be painted:
 - 1. Pre-finished wall, ceiling and floor coverings.
 - 2. Items with factory-applied final finish.
 - 3. Concealed ducts, pipes and conduit.
 - 4. Surfaces specifically scheduled or noted on Drawings not to be painted.

1.03 SUBMITTALS

- A. Product data:
 - 1. Not less than thirty (30) days before beginning work, submit a complete list of materials proposed for use, together with manufacturer's specifications.
 - 2. Paint materials and products shall be subject to Architect's approval.
- B. Color samples:
 - 1. Prepare color and finishes on samples, 8-1/2" x 11" in size.
 - 2. Submit samples as requested until required sheen, color and texture is achieved.
 - 3. Prepare wood samples on type and quality of wood specified for use on project.
 - 4. Label and identify each sample as to location and application.

1.04 COLORS

- A. Colors are to be selected or approved by Architect and actual color chips shall be supplied to Contractor for matching. All undercoats shall be tinted to approximately half the color of finish coat.
- B. Approval of final colors: Do not apply final coat of paint until colors have been approved by Architect.
- C. The number of colors to be used shall be as determined by Architect. Architect reserves right to vary colors throughout project.

1.05 DELIVERY, STORAGE AND HANDLING

- A. Deliver paint materials in sealed original labeled containers bearing manufacturer's name, type of paint, stock number, color and instructions for reducing or mixing where applicable.
- B. Paint materials and equipment
 - 1. Store only acceptable project materials on site.
 - 2. Store in a suitable location.
 - 3. Restrict storage to paint materials and related materials.
 - 4. Comply with health and fire regulations.

1.06 PROJECT CONDITIONS

- A. Comply with manufacturer's recommendations as to environmental conditions under which coatings and coating systems can be applied. Do not apply paint or coatings when temperature is below 50°F. Do not apply exterior paint in damp or rainy weather; ensure that the surface has dried thoroughly before proceeding. Surface temperature must be at least 5°F above dew point before painting.
- B. Do not apply finish in areas where dust or contaminants are being generated.

PART 2 - PRODUCTS

2.01 MATERIALS

- A. Basis-of-Design Product: Provide products listed from Behr Paint Company, Santa Ana, California 92705, or comparable products by one of the following. Other manufacturers to conform to materials listed and be approved by Architect.
 - 1. Kelly-Moore Paint Company
 - 2. Dunn-Edwards Corporation
- B. Materials selected for coating systems for each type surface shall be the product of a single manufacturer.
- C. Accessory materials such as thinner, linseed oil, putty and shellac shall be of the highest quality and by approved manufacturer, which comply with local VOC content limits regulations.
- D. Paints shall be ready-mixed except field catalyzed coatings.
- E. Do not thin finish coats without Architect's approval.
- F. Unsuitability of specified products: Claims concerning unsuitability of any material specified or inability to satisfactorily produce the work will not be entertained, unless such claim is made in writing to Architect before work is started.
- G. Number of coats scheduled is minimum. Apply additional coats at no additional cost if necessary to completely hide base materials, produce uniform color and provide satisfactory finish result.
- H. Submitted paints and coatings comply with the established VOC content limits of South Coast AQMD Rule 1113.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Examine surfaces scheduled to receive paint and finishes for conditions that will adversely affect execution, permanence or quality of work and which cannot be put into acceptable condition through preparatory work as included in Article 3.02 "Preparation ". Notify Owner's Representative in writing of any defects or conditions which will prevent a satisfactory installation.
- B. Examine surfaces scheduled to be finished prior to commencement of work. Report any condition that may potentially effect proper application.
- C. Maximum Moisture Content of Substrates: When measured with an electronic moisture meter as follows;
 - a. Concrete: 12 percent
 - b. Portland Cement Plaster and Stucco: 12 percent
 - c. Masonry (Clay and CMU): 12 percent
 - d. Wood: 15 percent
 - e. Gypsum Board: 12 percent
- D. Portland Cement Plaster Substrates: Verify that plaster is fully cured.

- E. Verify suitability of substrates, including surface conditions and compatibility with existing finishes and primers.
- F. Proceed with surface preparation and coating application only after unsatisfactory conditions have been corrected.
 - 1. Application of coating is construed as acceptance of surfaces and conditions.

3.02 PREPARATION

- A. Clean surfaces to receive paint thoroughly of substances, which could impair adhesion of paints, including dust, dirt, oil and grease before application of any coatings. Prepare surfaces as follows:
 - 1. WOOD SUBSTRATES: Remove mill glaze and dust, sand smooth. Fill open joints, cracks, nail holes and other pits or depressions flush and smooth with wood filler after priming. Use wood putty to match finish paint coat. Touch up knots or sap streaks with a stain-blocking sealer before priming.
 - 2. CONCRETE, PRE-CAST CONCRETE, TILT-UP: Remove release agents, curing compounds, loose particles, efflorescence and chalk. Do not coat surfaces if moisture content or alkalinity of surface to be coated exceeds that permitted in the manufacturer's written instructions. Prime with an alkali-resistant primer.
 - 3. PLASTER and STUCCO SUBSTRATES: Fill hairline cracks, small holes and imperfections on surfaces with patching compound. Smooth off to match adjacent surfaces. Apply an alkali-resistant primer or wash with fresh water and neutralize high alkalinity surfaces where they occur.
 - 4. MASONRY SUBSTRATES: Remove efflorescence and chalk. Do not coat surfaces if moisture content or alkalinity of surface to be coated exceeds that permitted in the manufacturer's written instructions. Prime with an alkali-resistant primer.
 - 5. SHOP-PRIMED STEEL SUBSTRATES: Solvent clean according to SSPC-SP1. Remove loose primer and rust, contaminants and foreign matter. Prime bare steel and touch up abrasions with a ferrous metal primer.
 - 6. STEEL, FERROUS METAL SUBSTRATES: Remove rust, mill scale, foreign substances and shop primer. Clean according to SSPC-SP3, "Power Tool Cleaning", or abrasive blasting cleaning according to SSPC-SP6 "Commercial Blast Cleaning" as required. Protect surface from corrosion until application of primer.
 - 7. GALVANIZED METAL: Remove oils, passivators and clean entire surface with an appropriate solvent. Pre-treat with a phosphoric acid etching solution to promote adhesion of subsequently applied coatings.
 - 8. PHOSPHATIZED METAL or GALVANNEALED METAL shall not be chemically etched. Clean and apply suitable metal primer.
 - 9. ALUMINUM SUBSTRATES: Solvent clean according to SSPC-SP1. Remove loose surface oxidation.
 - 10. GYPSUM BOARD SUBSTRATES: Remove dust and foreign matter. Fill pits flush and smooth with joint compound and where required, apply skim coat to provide the required finishing level based on GA-214-96, Recommended Levels of Gypsum Board Finish before application of decoration.
- B. Surfaces, which cannot be prepared or painted as specified, shall be immediately brought to attention of Architect in writing.
 - 1. Starting of work without such notification will be considered acceptance by the Contractor of surfaces involved.
 - 2. Replace unsatisfactory work caused by improper or defective surfaces as directed by Architect at no additional cost to Owner.

3.03 APPLICATION

- A. Do not apply initial coating until moisture content of surface is within limitations recommended by paint manufacturer.
- B. Application:
 - 1. Apply paint with suitable brushes, rollers or spraying equipment.
 - 2. Apply stain in accordance with manufacturer's recommendations.
 - 3. Rate of application shall not exceed that as recommended by paint manufacturer for surface involved.

- C. Comply with recommendations of product manufacturer for drying time between succeeding coats.
- D. Leave parts of molding and ornaments clean and true to details with no undue amount of paint in corners and depressions.
- E. Make edges of paint adjoining other material or color clean and sharp with no overlapping.
- F. Refinish whole wall where portion of finish is not acceptable.
- G. Apply materials evenly with appropriate film thickness and free of runs, sags, skips and other defects. Hard, glossy finishes shall be sanded lightly between coats, dusted and cleaned before recoating.
- H. Remove hardware, hardware accessories, plates, lighting fixtures and similar items in place prior to painting and replaced upon completion of each space.
- I. Disconnect heating and other equipment adjacent to walls using workmen skilled in appropriate trades, and moved to permit wall surfaces to be painted. Following completion of painting, they shall be expertly replaced and reconnected.
- J. Paint visible surfaces behind vents, registers or grilles flat black.
 - 1. Wash exposed metal with solvent then prime and paint as scheduled.
 - 2. Spray paint wherever practical.
- K. Do not paint over Underwriters' labels, fusible links or sprinkler heads.
- L. EXPOSED PLUMBING AND MECHANICAL ITEMS: Items without factory finish such as conduits, pipes, access panels and items of similar nature shall be finished to match adjacent wall and ceiling surfaces unless otherwise directed.

3.04 CLEANUP

Upon completion of work, remove equipment, excess material and debris, remove paint splatters and leave area in a neat and orderly condition.

3.05 PROTECTION

- A. Protect work of other trades, whether to be painted or not, against damage by painting. Correct damage by cleaning, repairing or replacing, and repainting, as acceptable to Architect.
- B. Provide "wet paint" signs to protect newly painted finishes. Remove temporary protective wrappings provided by others for protection of their work after completion of painting operations.
 - 1. At completion of construction activities of other trades, touch up and restore damaged or defaced painted surfaces.

3.06 FINISH SCHEDULE

- A. Finish surfaces in accordance with schedule. Catalog names and numbers refer to products as manufactured by the Behr Paint Company, Santa Ana, California 92705, except as otherwise specified.
- B. Provide paint finishes of even uniform color, free from cloudy or mottled appearance. Properly correct non-complying work to satisfaction of Owner's representative and representative of Behr Process Corporation.
- C. Some colors, especially accent colors may require multiple finish coats for adequate coverage and opacity.
- D. The specified number of primer and finish coats is minimum acceptable. If full coverage and opacity is not obtained with specified number of coats, apply additional coats as necessary to produce required finish.
- E. Application Finish Schedule:
