DryPlus® Masonry Waterproofer

- Smooth, Decorative Interior/Exterior Flat Finish
- 10 Year Guarantee*
- Withstands 12 PSI of Water Pressure
- Mildew Resistant Film
- 100% Styrene Acrylic
- Sprayable! Saves Application Time

**PREPARATION**

*Proper surface preparation is required.* New or Unpainted Surfaces: New concrete must cure for a minimum of 30 days. Test for loose, flaking concrete by pressing a piece of masking or transparent tape at various places, then pull it off with an abrupt action. If the tape does not pull the concrete from the surface, it can be painted. If the existing concrete is removed, the loose concrete should be removed down to a sound substrate. For **below grade application**: All holes or cracks must be properly patched with a fast setting hydraulic cement. For **above grade application**: Remove mildew stains with a mildew stain removing product. All surfaces must be clean and free of dirt, dust, efflorescence and oil. Clean surface with a Concrete & Masonry Cleaner & Etcher. Follow all label instructions. **Previously Painted Surfaces**: BEHR DryPlus® Masonry Waterproofer provides best results when applied to bare or untreated surfaces. PREVIOUSLY PAINTED SURFACES IN GOOD, REPAINTABLE CONDITION MAY BE PAINTED WITH BEHR NO. 875 or No. 876 Basement Gray. For other previously painted surfaces, consult a Behr Certified Coatings Professional.

**APPLICATION**

Stir well before use. Do not thin product. Use with adequate ventilation. Use product when air and surface temperature are 50-90°F (10-32°C). Apply to dry or slightly damp masonry walls. Wipe off any visible moisture with a dry cloth before painting. Apply using a high quality 1/2-3/4” nap roller, 4” nylon/ polyester brush or an airless sprayer capable of delivering 0.5 GPM or greater using a .023-.025” spray tip. **Two coats minimum are required**: First Coat: Using a brush or roller, work the waterproofer onto the surface until all pores or voids are covered. Second Coat: Using a brush or roller, cover the entire surface. Properly fill any voids left after the first coat. Additional spot application may be needed depending on the porosity of the surface. Important: If leaking is still present after two coats, it indicates that voids or pinholes are still open. Re-apply product to these areas. DO NOT thin product or apply at a greater spread rate.

**DRIY TIME**

Low temperatures or high humidity conditions will affect drying time. Full cure should be reached in 7-14 days.

**DISPOSAL**

Properly dispose of all soiled rags and protect unused product from freezing. For disposal of empty containers and unused product contact your household refuse collection service.

**WARNING** If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC Contact the National Lead Information Center at 1-800-424-LEAD or log on to www.epa.gov/lead.

**WARNING** Sanding or scraping pressure treated lumber may be hazardous; wear appropriate protection.

**LIMITED WARRANTY**

Behr Process Corporation warrants to you, the original residential consumer purchaser, the performance of this product as described on this label for 10 years from the date of purchase. THIS WARRANTY IS NOT VALID WHEN THE PRODUCT IS NOT PROPERLY APPLIED TO A PROPERLY PREPARED, VERTICAL SURFACE OR CARED FOR IN ACCORDANCE WITH THE LABEL DIRECTIONS. This warranty is not transferable. If this product is found not to perform as specified on the label during the warranty period, Behr Process Corporation will, at its option and upon presentation of proof-of-purchase (the original receipt), either repair the damage or replace the product. This warranty does not apply to damage caused by accident, improper application, misuse, abuse, lack of proper ventilation, acts of God, weather and conditions beyond Behr Process Corporation’s control. BEHR DryPlus® Masonry Waterproofer provides best results when applied to bare or untreated surfaces. Properly fill any voids left after the first coat. If leaking is still present after two coats, it indicates that voids or pinholes are still open. Re-apply product to these areas. DO NOT thin product or apply at a greater spread rate.

**CAUTION** Irritant may cause eye, nose and throat irritation. Avoid contact with skin and eyes and avoid breathing of vapors and spray mist. Wear eye protection and protective clothing. Use with adequate ventilation. To avoid breathing vapors and spray mist, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches or dizziness, increase fresh air. If properly used, a respirator (NIOSH approved for organic vapor with P series particulate pre-filter) may offer additional protection; obtain professional advice before using. A dust mask does not provide protection against vapors. Avoid contact with eyes and skin. Wash thoroughly after handling. Close container after each use. FIRST AID: If you experience difficulty in breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical assistance immediately. In case of eye contact, flush immediately with plenty of water for at least 20 minutes and get medical attention; for skin, wash thoroughly with soap and water. If swallowed, get medical attention immediately.
