IMPORTANT! DO NOT OPEN POUCH WITHOUT READING INSTRUCTIONS.

BEHR PREMIUM® ANTI-SLIP FLOOR FINISH ADDITIVE is a unique texture additive, which, when mixed with a finished product container of paint or solid color stain creates a slip-resistant coating for all types of interior and exterior floor surfaces. This product will not change the color of the floor coating. For a high-quality finish use one of the many BEHR PREMIUM floor coating products:

PORCH & PATIO FLOOR PAINT • 1-PART EPOXY • SOLID COLOR CONCRETE STAIN

APPLICATION:

Garage Floors • Patios • Stairs • Basements • Driveways • Walkways • Pool Decks

MIXING INSTRUCTIONS:

Add the proper amount of **BEHR PREMIUM ANTI-SLIP FLOOR FINISH ADDITIVE** directly to the container of any latex or oil-based floor coating finish and stir thoroughly until dispersed uniformly. Stir occasionally during application. Apply coating to floor surface using a brush or roller. Refer to all paint and stain manufacturer's product labels for specific instructions on surface preparation and finish application. If applying more than one coat of floor finish, mix **ANTI-SLIP FLOOR FINISH ADDITIVE** only into the final top. Adding a anti-slip additive will reduce the lifespan of the product; therefore, retain any leftover paint for periodic maintenance re-coating.

This product, if added according to label directions, helps to prevent slipping by providing a slip-resistant coating. However, Behr does not warrant that this product will prevent accidents.
