READY TO USE. PROTECT FROM FREEZING.

WHERE TO USE: Properly prepared Interior/Exterior wood surfaces exposed to direct sunlight. Ideal for residential applications, patio furniture, doors and wood handrails. NOT RECOMMENDED for use on Exterior siding, or Exterior wood decking and stairs. Do not use over painted surfaces, wax, shellac, fresh lacquer or lacquer sanding sealer. CAUTION: Top coated surfaces may be slippery when wet.

SURFACE PREPARATION† (The following steps are recommended for best results.) For refinishing, remove all wax or cleaner build-up with a wax stripper or degreaser prior to sanding. Sand all surfaces in the direction of the wood grain to desired smoothness. DO NOT USE steel wool. Remove all dust from sanded surfaces and clean with tack cloth.

APPLICATION Do not shake or thin. Do not apply in direct sunlight or in temperatures below 55°F (10°C) or above 90°F (32°C). Stir thoroughly prior to and during use. If wood stain color is desired, apply BEHR® Wood Stain. Follow all label instructions. Using a high quality natural bristle brush, dip approximately an inch into the can, gently tapping it against the inside to remove any excess. Apply a thin, even coat following the direction of the grain making sure to maintain a wet edge. To minimize the brush marks and bubbles after staining application, tip off the surface by holding the brush at a 45° angle and lightly run the bristles over the entire length of the wood. Do not puddle, over-brush or overlap finishes. Sand lightly between coats.

DRY TIME Dries to the touch in 2 hours. Sand or Recoat: 2 - 4 hours. After final coat, allow 12 - 24 hours before light use. Fully cured: 3-4 days after final coat.

DISPOSAL For disposal of empty containers and unused product, contact your household refuse collection service.

LIMITED WARRANTY Visit behr.com/warranty or call 1-800-854-0133 Ext. 2 for more information.

‘WARNING If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC. Contact the National Lead Information Center at 1-800-424-LEAD or log on to www.epa.gov/lead. A quality product that contains a mildewcide will assist in providing a finish that is resistant to mildew, provided that all existing mildew is removed prior to application. While this product does contain a mildewcide, it will not prevent mildew growth.

WARNINGS. WARNINGS MAY VARY BETWEEN PRODUCTS AND OR COLORS.
